DETAILED ACTION

Examiner acknowledges receipt amendment and remarks filed 8/08/06. Claims 60-66, 68, 72, 73, 77 and 87-90 are pending.

Response to Arguments:

Any previous rejections not reiterated herein have been withdrawn.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 60-66, 68, 72, 73 and 77 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. This is written description rejection in view of "derivatives" recited in currently amended claim 60.

The specification discloses lauric acid or myristic or palmitic or stearic or arachidic or lignoceric or palmitoleic or oleic or linoleic or linolenic as efficacy enhancing components. However, there is no description for what the derivatives of the above fatty acids are. The specification does not state that by derivatives of ... we mean ... or derivatives of ... are

The specification does not provide guidance or any working examples or identification of the derivatives of the recited fatty acid, and thus the artisan would have been unable to prepare

Art Unit: 1618

the claimed composition derivatives of fatty acids without guidance as to what derivatives of the fatty acids are.

The above rejection may be overcome by removing derivatives from the claims.

3. Claims 87-90 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. This is new matter rejection.

The specification as originally filed does not provide support for molar ratio of efficacy enhancing component to therapeutic agent of 3:1, 2:1, 1:1, 1:2 and 1:3. The recitation therefore, of the complex comprising "a 3:1, 2:1, 1:1, 1:2 or 1:3 molar ratio of efficiency-enhancing component to therapeutic component.

The above rejection may be overcome by removing the new matter from the claims.

The previous prior art may be reinstated upon removal of the new matter from the claims.
